

#7 Golden Rules Of Circular Arrangements In Reasoning#

(i) Draw a circle – mark the places (4/6/7/8) – and then start reading the question!
Example:- (Four people facing towards centre)

(ii) Arrange the information in every sentence – if possible – if not – write it down beside you circle in shorthand – to be arranged when further information clarifies the position.

Example:- B is sitting 2nd to the right of A.(Direct Info)

C is Neighbor of B.(Indirect Info)

(iii) If P has two possible ways to be seated – namely Seat 1 and Seat 2. You are not understanding from the available information, where to seat P. So you, arbitrarily seat him in either Seat 1 or Seat 2.

Let's say you seated him at Seat 2 – ok – now go ahead and try seating the others as per the rest of the information in the question.

If you are able to seat them all without any contradictions or problems, you have successfully solved the question and P's seat that you chose is correct.

And if you find a contradiction of P's Seat 2 – then you immediately know for sure that Seat 2 is not the right place of P and it has to be Seat 1, as there were only 2 possibilities!

(iv) Always arrange those person's around your circle, whose positions are 100% clear and accurate.

(v) If there are 4/6/8/10 persons, i.e., even number of people then they have to sit in opposite direction in pair. It means one will always sit the opposite to other person.

(vi) Where some are facing outward and some facing inward, then mark the places with arrows pointing inward/outward.

(vii) Practice! The Golden Rule to solving Seating Arrangements – advocated everywhere by everyone is – LOTS OF PRACTICE!
Honestly, there is no other way around it!
